The conference will take place at Institut National des Sciences Appliquées de Lyon", known as INSA Lyon from October 29th to 31st, 2007. The language of the conference is English. Thematic workshops will focus on topics of Enterprises and Production, which will be defined by the appropriate Programme Committee. Several special tracks are planned. Potential track chairs can submit their proposals.

The aim of the conference is to bring together researchers from academia and industry as well as practitioners for discussing multidisciplinary views on digital information management, science and technology. Different committees serve to address the aim of the conference in a way as to highly stimulate interaction amongst the participants and define the appropriate programme.

The BayesiaLab award will be granted to the best paper in the field of data mining.
