

Editorial

We present the third issue of this volume with the three research works.

In the first work on “**Internet in Marketing & Decision Process based on Business Intelligence Model**” the author *Tanzila Saba* studied the impact of Internet on marketing and its effects on business decision process. The model proposed explains how the data through Internet is collected and corroborated and analysed. The outcome is that how marketing information system include customers, equipment and procedures analysis contribute to help decision makers make better decision.

In the second paper on “**Influence of Internet-based Information Technology in the Information Literacy in Higher Educational Institutions**”, the author *Zheng Xu* analysed the current stations of teachers information literacy during the teaching in universities and colleges, and discussed the methods of obtaining teachers information literacy.

In the last paper on “**Online Social and Financial Management Medium for Non-business Enterprises**”, the authors *Alexandre Cunha and Fernando Almeida* developed a digital donation platform based exclusively on open source technologies. The authors claim that the application permits anonymous donations and allows the monitoring of the status of each donation by the donors.

The papers are significant to the web studies domains.
