

# Third International Conference on Digital Data Processing

[www.socio.org.uk/ddp](http://www.socio.org.uk/ddp)

[VIRTUAL MODE EVENT]

November 11-13, 2022

**(IEEE CPS. Papers should follow IEEE template)**

Digital data technologies gain growth in the last two decades and have widespread applications. In the information world, humans and machine agents are dependent on good quality data to be capable to infer and learn from it through a process of knowledge engineering. Users leverage opportunities to implement interventions that could facilitate optimal access to reputable scientific data, thereby fostering the knowledge process by making data findable and available to information agents. Many professionals and end-users need to continuously develop their data skills to enable themselves to be smarter in the use, process, visualize and apply data.

The topics in DDP 2022 include but are not confined to the following areas.

Information Technology Management

Web Mining including Web Intelligence and Web 3.0
