#### **The Fourth International Conference on the Networked Digital Technologies (NDT 2012)**

**April 22-24, 2012  
Canadian University of Dubai, UAE**

The NDT 2012 proceedings will be published in the Communications in Computer and Science (CCIS 136) Series of Springer LNCS

The proposed conference on the above theme will be held at the Canadian University from April 24-26, 2012 which aims to enable researchers build connections between applications.

Currently, a number of institutions across the countries are working to evolve better provide collaborative technology services for scholarship by creating shared cyberspace collaboration, but this is a challenge for the institutions for a number of reasons.

years, the landscape of digital technology applications projects for the various humanities, social sciences, and sciences appears induced by many initiatives. For research clusters, the research community has thousands of databases, websites, local clusters, and web-based tools around individual themes, interests and projects. In most tools and resources are and were created to meet the specific needs of a particular many cases, the funding and support for these critical initiatives is fragile and temporary, in piecemeal fashion. There is a need to provide concerted efforts in building federated technologies that will enable the formation of network of digital technologies.
